

The mgcv package as a one-stop-shop for fitting non-linear ecological models

David L Miller

Good morning!

Who is this guy?

- (mostly) Cetacean distribution modelling
- Spatial modelling (esp. model checking)
- Distance sampling distancesampling.org
- Statistical software (Distance, mrds, dsm)
- Not a biologist/ecologist (not even really a statistician)

Who are you?

What is the structure of the day?

Timing

- 8am to 5pm
- Morning session: 9am-12pm
- Aternoon session: 1pm-5pm

(Approximate) schedule

Time	Thing
0900-0915	Intro

Credits

- Course based on one given at ESA 2016
 - Eric Pedersen, UWisc, now DFO
 - Gavin Simpson, U Regina
- Using many of the materials from that course
